# V-CROSS CLASSIC

## V-CROSS DESIGN VS. FLAT FRONT TRAILERS

The unique V-Cross design maximizes headroom and storage room.

V-Cross design directs air flow around the sides of the trailer. Air impacts and scatters around and above flat front trailers.

### GET THE V-CROSS ADVANTAGE

#### MORE USABLE SPACE – BETTER AERODYNAMICS

The V-Cross shape creates 75 cu. ft. of extra interior space for larger bathrooms, bedrooms and kitchens with full interior height at the front end of the trailer. The "V" design cuts through wind, improving aerodynamics for better fuel efficiency. LP bottles and batteries are safely enclosed. Air flow around the front end deflects bugs and debris, keeping the unit clean and improves towability.
