

2003 Truck Camper Buyer's Guide
Features, Options and Floorplans

This land is Lance land...

the SUV of RVs!

Lance

**America's Favorite
Truck Camper™**

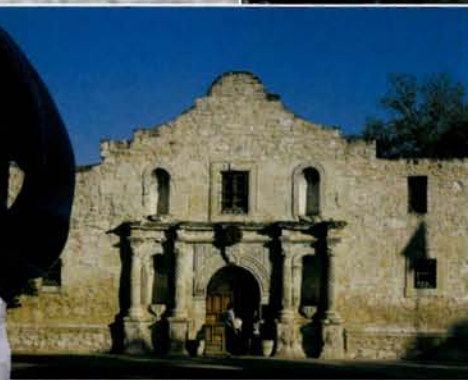

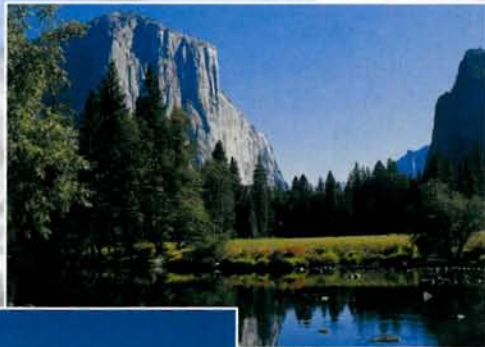

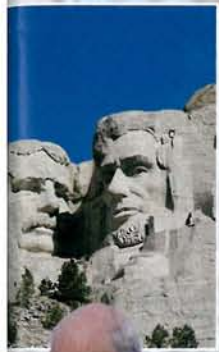

Places to go, things to see and so much to do, all around America.

For almost four decades, Lance has provided a unique, terrific way to visit and cherish the beauty of America. And now, more than ever, visiting our land seems to be more compelling.

All of us at Lance are very pleased and proud to offer quality products that bring great pleasure while providing a sense of security and control when traveling.

We hope you will consider a new Lance camper as the way to see all the wonders of our land... because America is Lance land.

*Jack Cole
President, Lance Camper Manufacturing*

This land is your land...

May we take you there?

For 2003 you will find the quality and features that continue to make Lance the choice of so many camper owners. Outside, a new roof line provides more interior headroom. Notice our fresh new graphics that still say "Lance". Inside... well, it's all new—from the wall covering to the pewter drawer pulls. Stainless steel oven doors and white appliances brighten up the interior. Every model and every floorplan has been re-engineered from top to bottom. You'll love the way they look, and perform...better than ever.

Lance Slideout. The Ultimate SUV

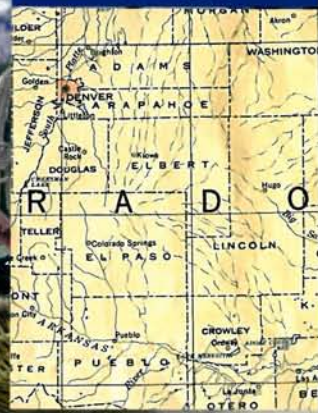

*"25 miles from nowhere...
a short hike home."*

When you love to travel, but really want to relax, Lance is the answer. Especially with our most luxurious line... the Lance Slideouts. The slide room provides an amazing amount of floor space and a four-person booth-style dinette for eating, playing games or simply lounging.

This popular, full-featured Lance Slideout 1121 boasts a spectacular dry bath, large wardrobe and full-featured galley.

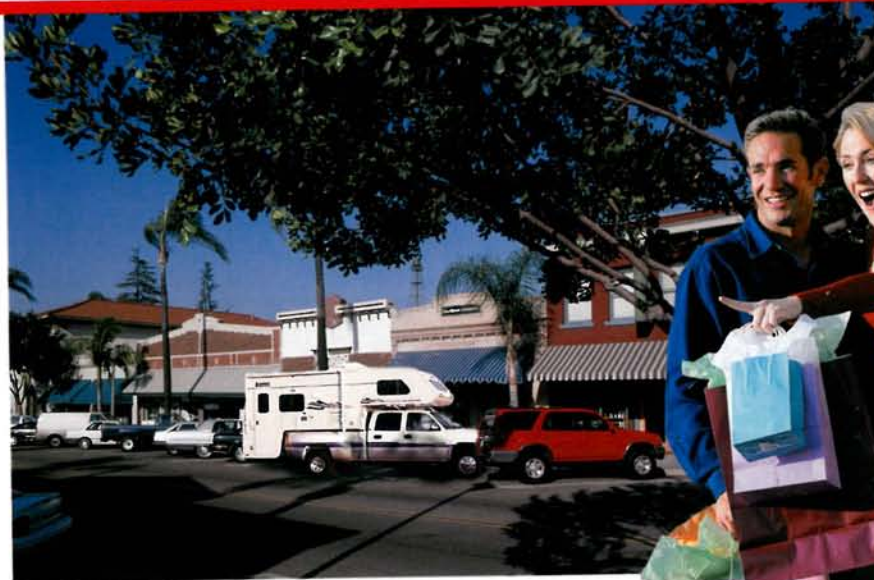

Colorado

Valued inside and outside storage space is another added amenity with the luxurious new Lance Slideout models.

Push-button electric slideout sets up in less than ten seconds.

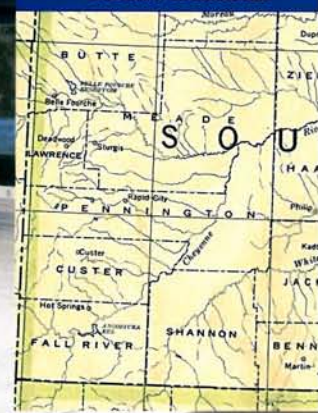

"We've just got to pick up a few things... before we visit the folks."

Inside you'll find all the features of a luxury motor home. Outside dimensions are not much bigger than that of an SUV. Getting around town is a breeze, and a stop to shop birthday gifts for "Mom" is as easy as sliding right into that parking slot.

The Lance Slideout 1161 with side door entry. It's our most spacious camper, with a dry bath, massive galley, and a comfortable driver side slide-out dinette. It's a perfect travel companion.

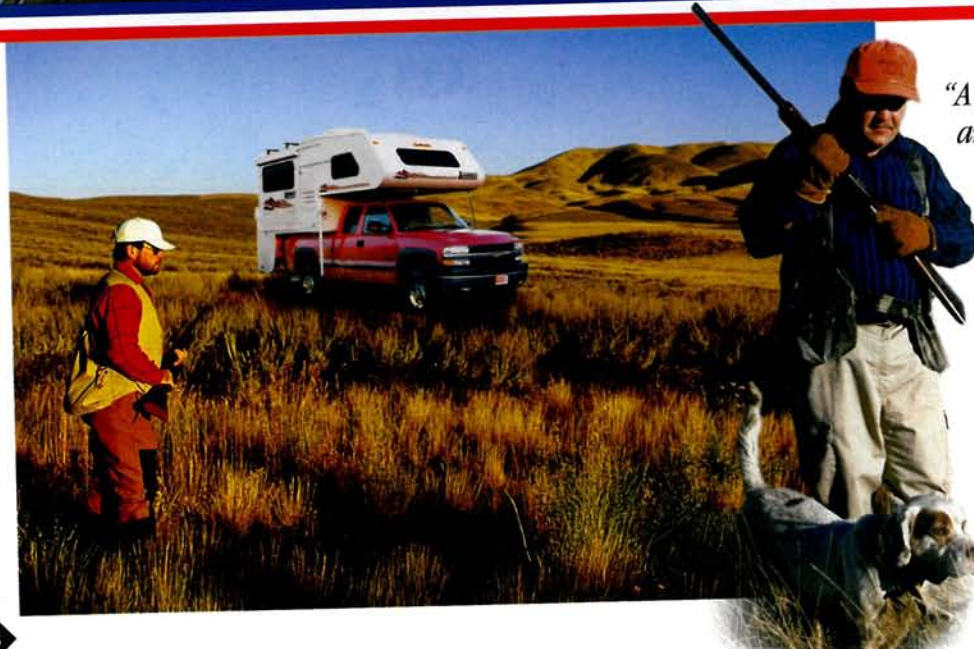

South Dakota

A great option...our exclusive Lance Family Room can be added to a side awning, providing a screened-in area. Roll-down panels add privacy. It's available for most models.

This Lance Slideout 1161 and Lance 1030 dry bath gives you the convenience of dressing in a dry area after showering. A large skylight adds more headroom and natural daylight.

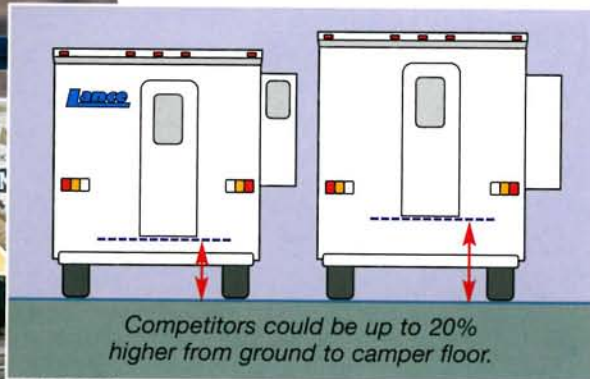

*"A great reason for another season...
and your Lance can go right to the action"*

A truck camper brings you to the America you want to find. Right up close and personal. You can not only stow or tow all your gear, you can get to where the hunting is because every Lance is engineered and constructed for rugged use. And when it's time to move on, you're already packed and ready to go... with a nice hot cup of coffee.

The **Lance Slideout 921**, with its open floor plan, features complete galley, a roomy bath, and slideout front dinette. A generator is also a popular option.

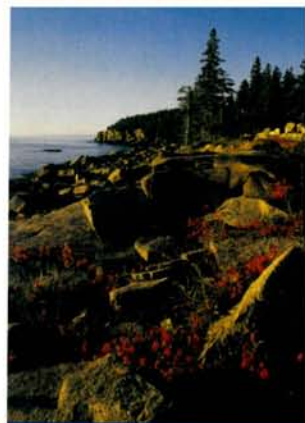

We build our Slideout Campers without a raised floor! Lower overall height and less weight provide better performance and handling, with less wind resistance and a lower roll center. Entry is much easier.

The optional Generac Guardian propane-powered generator with state-of-the-art electronics and performance provides 3400 watts of power, enough to run all the camper appliances simultaneously, including the air conditioner. A converter provides the clean, stable power necessary to operate modern electronics.

The **Lance Slideout 821** is specially designed for heavy-duty short-bed trucks. Roomy bath, split holding tanks, and a generator option make this unit very versatile.

Oregon

Lance. The Versatile SUV

"Tote it on top...or tow it behind."

The standard Yakima roof-mounted tracks provide for numerous optional rack accessories to carry just about anything, even a canoe. Or, if you like, tow your large watercraft behind.

The **Lance 1130** has a spacious food counter, extended cabover queen-size bed, pull-out pantry, U-shaped dinette and plenty of kitchen storage. You can really feel the openness.

Lance and Lance Slideout models have an exclusive white one-piece aluminum roof (with 12-year warranty), a major breakthrough with significant advantages over rubber and other roofing materials. It's clean and super tough. The baked-on white enamel finish also keeps the camper cooler in summer (shown with standard Yakima roof tracks and optional Yakima towers with cross bar.)

Wyoming

The extra large 6' 3" dinette is in the **Lance 820, 1010 and 1130**. Eating area has extensions for added seating and easily converts into a large bed. The table slides to various positions for comfortable dining.

This spacious dry bath is in **Lance 1130**, and **Lance Slideout 1121**. It includes ducted heat, medicine cabinet and lots of elbow room.

"Bring your new condo to the old neighborhood...life's a picnic."

No hotel, motel or guest room for you. You brought the bedroom and much more. Wait 'til you surprise your friends with their favorite dish, made right in your own kitchen.

The Lance 920 creates the feel of an 11' camper in only 9'6". The spacious view window over the forward dining/sofa bed makes it truly unique. The large bath and wardrobe add to this compact unit's comforts.

The special pull-out pantry allows easy access to your groceries. It's included in most Lance models where space permits. Note the stainless steel oven door and new white appliances.

The high tech monitor panel is placed at eye level for convenience.

Roll-out storage drawer (part of the Convenience Package) is a great space maker. Available on all Lance and Lance Slideout models, except Lance 920.

The exclusive slide-out battery tray on Lance and Lance Slideout models makes service easy and convenient for deep cycle batteries as large as group 29. Battery is a dealer-installed item.

New York

Another Lance exclusive (most models) is this aluminum rear bumper, shown with deluxe trim. The rear jack brackets are attached to the bumper for greater stability and strength. Two-position fold-up step is plated on both sides for safety.

"Lance time is anytime."

Weekend fun doesn't stop when the sun goes down. Even outside activities get a boost from the convenient high-intensity docking lights which are part of the Convenience Package. Aren't you guys tired yet?

Lance 820 – 8' 11"

Specially designed for heavy-duty short-bed trucks. Roomy bath, split holding tanks, and a generator option make this a real winner. Shown with optional twin beds.

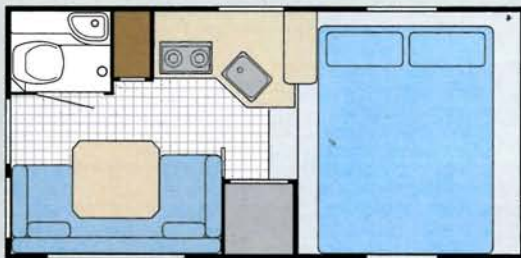

Lance Slideout 821 – 8' 11"

Specially designed for heavy-duty short-bed trucks. Roomy bath, split holding tanks, and a generator option make this unit very versatile.

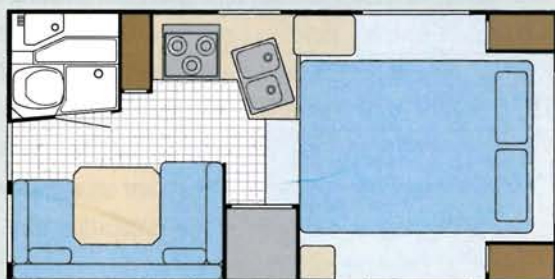

Lance Slideout 921 – 9' 6"

This open floor plan features complete galley, a roomy bath, and slideout front dinette.

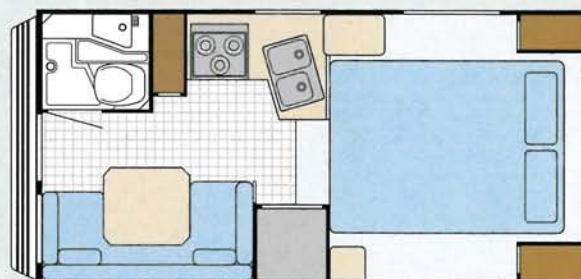

Lance Lite 815 – 8' 6" (Standard Cab)

Lightweight, full-featured camper for single rear wheel trucks that is lighter, lower and sleeker than full size models. Also available with extended cabover. Add-on skirts make this model compatible with short-bed full-size trucks.

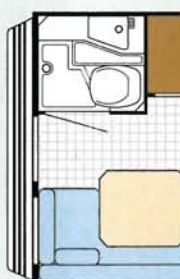

Lance Lite 835 – 8' 6"

Completely self-contained and very economical. Easy to handle. Features split gray and black holding tanks.

Lance Lite 845 – 8' 6"

For short-bed trucks. Completely self-contained, generous bath and complete galley. Features split gray and black holding tanks.

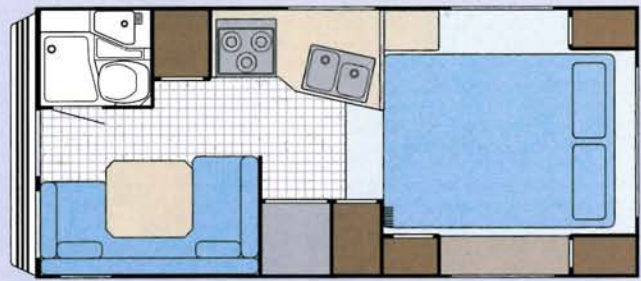

Lance Lite 921 – 9' 6"

The most popular model. Features a very lightweight and optional generator.

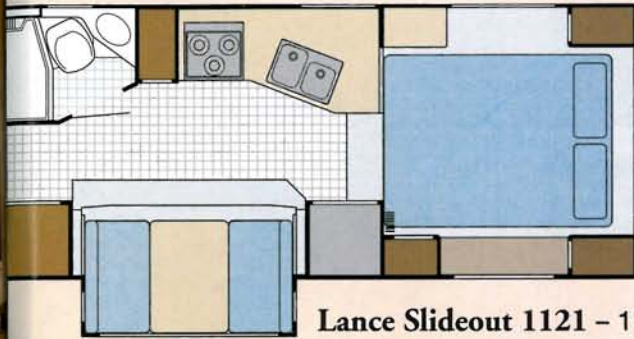

Lance 920 - 9' 6"

This open floor plan features a roomy bath and front dinette with fold-over sofa and a view window.

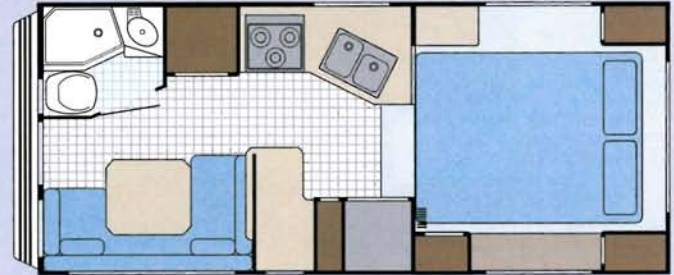

Lance 1010 - 10' 1"

Popular floorplan with a large bath and a dinette capable of sleeping adults. Great length for convenience and excellent towing capabilities. Available with generator option.

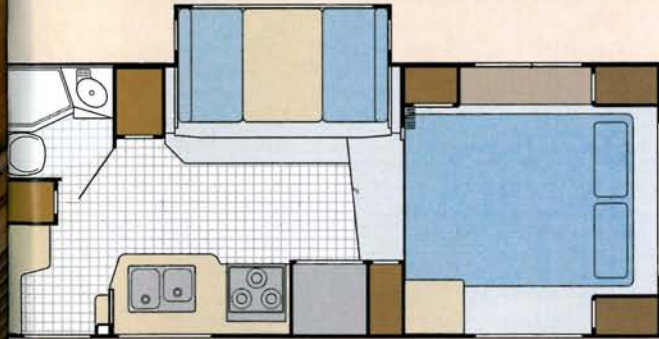

Lance Slideout 1121 - 11' 6"

This popular, full-featured model boasts a spectacular dry bath, large wardrobe and full-featured galley.

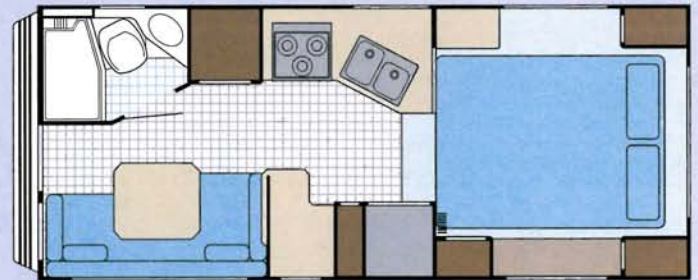

Lance 1030 - 10' 11"

This floorplan features a large kitchen with extra counter and drawer space, dry bath and room for an optional generator.

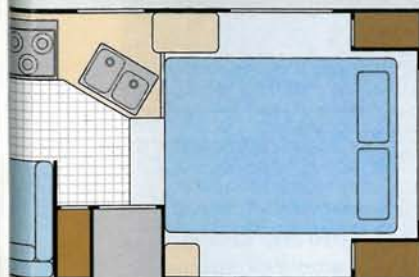

Lance Slideout 1161 - 11' 11"

Our full-featured side-door model, with a driver's side slideout, dry bath and abundant storage.

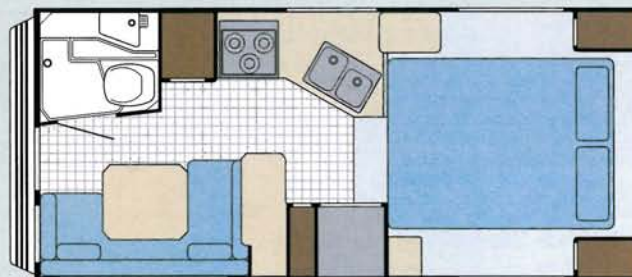

Lance 1130 - 11' 6"

This one has it all...tub/shower dry bath, U-shaped dinette, outside storage and lots of counter space.

Lance 1015 - 9' 6"

Popular size self-contained camper at a great price. Now available with an optional generator.

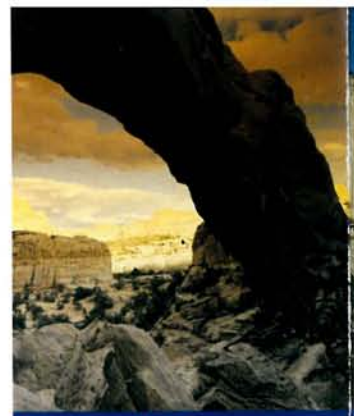

Lance Lite 1025 - 10' 3"

This floorplan features a large kitchen with extra counter and drawer space and room for an optional generator.

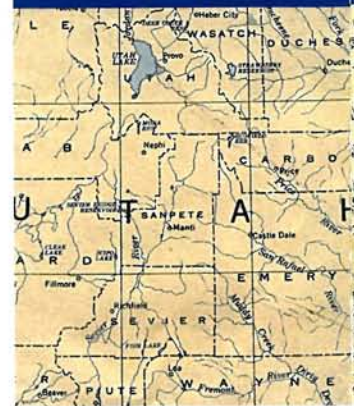

Our **Lance 820** has a built-in TV cabinet above the sink, removable counter and deluxe microwave. Split holding tank system with separate black and gray water holding tanks is unique in eight foot campers, and a Lance exclusive.

Twin beds in the cabover area are optional on all Lance and Lance Slideout models. The comfortable innerspring mattresses with bed covers are separated by a night stand. Additional storage is provided with overhead cabinets.

Utah

Entertainment is available everywhere with the optional TV antenna/satellite dish combination.

This spacious, full-height bath featured in our **Lance 820 & 1010** and **Lance Slideout 821** provides ample leg room, ducted heat and exhaust fan/vent. A skylight provides extra head room.

This Folding Cabover Privacy Door is part of the Lance/Lance Slideout Décor Package.

Features & Options

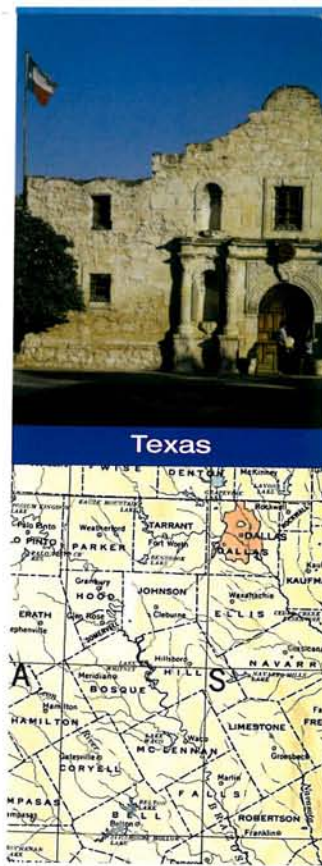

*"Hitch up your favorite kind of cargo...
and take along all the kids"*

Whether you're a champion roper making the rodeo circuit like our very own Bill Huber, pictured here, or just into horsing around, this camper was designed to take it. Bill puts his Lance camper to the test, traveling 150,000 miles every few years. Whatever your style of riding, Lance lets you spend your vacation time home on the range.

This Lance innovative extended cabover design is shown with optional Décor Package. It includes deluxe valances, pleated shades, indirect lighting and bi-fold privacy curtain. The quality queen mattress assures a comfortable night's sleep. The wardrobe drawers and shelving complete this master suite.

The optional integrated thermostat controls both heating and air conditioning in one unit.

Removable carpet kit adds comfort and warmth when needed. It's part of the optional Décor Package.

With the camper on the truck or off, the optional rollout side awning and the rear awning add both abundant shade and protection from the weather.

Lance Lite. The Lightweight SUV

"Beach volleyball anyone...hey, your Lance Lite wants to play in the sand, too."

If life really isn't worth living without playing close to water, what are you waiting for? There's an economical and practical way to spend the holidays at the beach...with a Lance camper. When you look at it, Lance takes all the work out of the fun.

The **Lance Lite 1025** has the appeal of a traditional floorplan. Seating in the rear dinette that converts to a bed, a convenient food bar and space for an optional generator are all features of this popular model (shown with optional oven.)

The optional extended cabover in our **Lance Lite 815** model includes a full-size queen bed. Shown with optional front window. Cabinets come with extended cabover option only.

Lance Lite extended cabover with queen-size bed, is standard on models **835, 845, 915 and 1025**. The front cabinets provide extra storage.

The **Lance Lite 815** is shown with optional short bed modification skirts. They provide extra storage, and the required brake and tail lights.

California

"Wintertime is Lance time."

With your four-wheel drive truck and your new Lance camper, you can go just about anywhere, anytime, with all the comforts of home. It is truly the all-season combination. Now you can play right next to where you stay.

Lance Lite 915. This mid-size model is ideal for most heavy duty single rear wheel trucks. It includes lots of storage in addition to a large bath and complete galley. It's shown here with optional 3 burner range/oven and stereo. A generator is also a popular option.

Optional child restraint with bunk pads is a great Lance option. Kids love it.

Optional Cargo Net retains extra gear while traveling. Both are available on models with folding bunk.

Optional Fan-tastic roof vent quickly removes odors and hot air. It can replace air in minutes (exhaust only.)

Exterior Combination Stripe Colors

Everyone admires a beautiful Lance camper mounted on a nice truck, especially when it is color coordinated. Lance offers an extensive lineup of color combinations that complement virtually any late-model truck. Select a graphic color combination to complement your truck.

Nobody beats Lance when it comes to style, inside or out!

Lance and Lance Lite Standard Colors

A neutral color stripe is on all models except Lance Lite 815.

All standard aluminum models and Lance Lite models with optional Filon fiberglass sides have color stripes consisting of two colors plus neutral stripes to match truck color.

Just below that is a silver/gray/bronze stripe.

The exterior combination stripe colors are shown above.

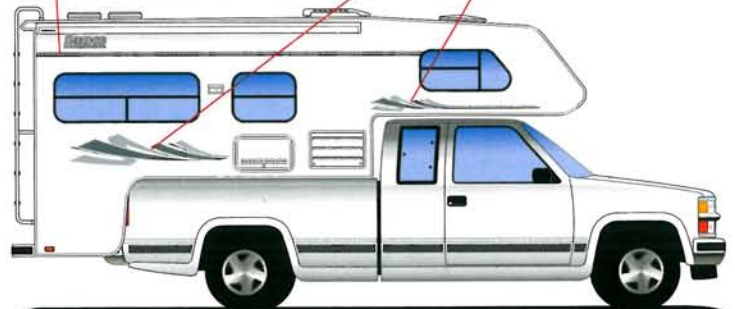

Lance and Lance Slideout Exterior Package* Colors

A neutral color stripe is on all models.

The Filon fiberglass walls have their own deluxe graphics, which can be color coordinated with the truck.

The exterior combination stripe colors are shown above.

^{*}optional on Lance, standard on Lance Slideouts, not available on Lance Lites

Matching your truck and camper

Truck manufacturers provide consumers with certain ratings to help determine the capacities of the truck, as manufactured. Some of those ratings are posted on the driver door jam and some may be shown on a label in the glove box or in the owner's manual or other literature.

If you already own a truck that you intend to use for a camper, it is always wise to take it to a commercial truck scale to determine the actual weight of the truck. That information, along with your truck capacity information, will help you determine the remaining capacities for carrying and/or towing.

Camper weights, both dry and wet, vary depending on optional equipment and how full tanks are. Also, take into consideration the weight of passengers, gear and trailer tongue weight, if applicable.

Truck and camper package handling can be greatly improved by the addition of air bags, cabover struts, and even special shock absorbers. Maintaining maximum tire pressure on quality tires with ratings equal to, or better than, original tires is also important.

For more information and guidance, consult your authorized Lance dealer. Because Lance Camper Mfg Corp is unfamiliar with your specific truck and how you intend to use it, **LANCE MAKES NO WARRANTIES OR REPRESENTATION, EXPRESS OR IMPLIED, AS TO THE PERFORMANCE OR RELIABILITY OF YOUR TRUCK WITH A LANCE CAMPER.**

Warranty

If you ever need service on your Lance camper when away from home, you can visit any one of more than 100 Lance dealerships. If there isn't one close by, just stop in at any reputable RV service facility and have them contact Lance for authorization to repair under warranty, if applicable. It's that easy.

Why all Lance campers have a metal roof

We think our entire camper should be trouble-free for decades, and that most certainly includes the roof. Although most RVs use a material commonly referred to as a rubber roof, we prefer to use aluminum for a number of reasons. It's almost impossible to penetrate, adds strength to the structure, takes very little maintenance, has an immeasurable life span and does not "chalk" or mark the sides of our product. Of course, rubber roofs are a lot easier to install. Maybe that is why other manufacturers install them.

Our exclusive aluminum roof is backed with a 12-year warranty. Just another reason why Lance campers are always in demand, hold their resale value, and outlive the competition.

Campers are a wise choice

If you're in the market for an RV, and you're trying to decide among a motorized, towable or truck camper, here are some practical considerations to keep in mind. Go to: www.lancecamper.com

Proper support equipment improves handling, performance and ride

The following accessories help to improve the drivability, handling and safety of your truck and camper package. All the support equipment listed below is optional except for the 12-volt connector and the camper jacks. Consult your Lance dealer for the proper support equipment for your new camper.

Air Lift® air bags

They level the truck by transferring the rear axle load forward. They also increase stability and the air pressure can be adjusted for different load conditions (right to left, front to back). Lance recommends them for all truck camper applications.

Cabover struts

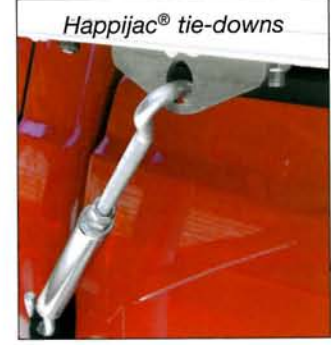

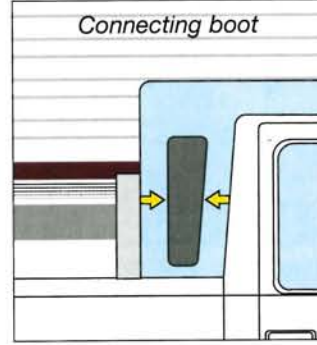

Absorb the bumps while driving on or off the open road. Specially-designed brackets securely attach cabover struts to the truck.

Camper clearance

Truck bed sizes and bed-to-cab heights vary for different makes and model years of trucks. To prevent damage to camper or truck, there needs to be a minimum of 1½" of clearance between the truck cab and camper, and at least ¼" between the truck bed rails and camper wings. Be sure there is at least ½" clearance for taillights, where applicable. This may require a bed liner, a bed mat or other form of spacing to insure proper fit.

Camper guides

Lance offers exclusive guides to assist with aligning camper to center of truck bed. Guides also prevent camper from moving while driving.

Connecting boot

An exclusive option created by Lance, it compresses between your truck and camper, providing a convenient way to communicate and a passage between truck and camper through the sliding windows. Available for most trucks.

Happijac® tie-downs

The safest and strongest on the market, these chrome-plated camper anchors are designed to eliminate bulky, unsightly or dangerous protrusions. Front tie-downs are spring-loaded to absorb unexpected bounces.

Rancho shocks

Adjustable shocks are a great asset for improving the ride under all conditions. They add more stability in windy conditions or on rough roads, and improve the ride substantially on seamed highways. Rancho 9000 shocks have proven to do an excellent job and are easily adjustable. For added convenience, an in-cab control kit is available so your ride can be fine-tuned while driving.

Swingout brackets

Move the front jacks in an outward direction to avoid striking the fenders on trucks with dual rear wheels.

Cabover struts improve ride and drive.

Stainless steel quick-release connectors on both ends make installation a breeze. A Lance exclusive.

Cabover struts, also known as "stabilizers," are shock absorbers designed to reduce the impact of up-and-down motion created by irregular road surfaces. Your truck already has large diameter shock absorbers to dampen the motion of the vehicle.

These specially designed, aircraft-quality "shocks" do a remarkable job of smoothing out the camper ride. They also help reduce sway in windy areas.

What you need to know about camper hitch systems

There are a variety of ways to hitch up a trailer to your truck/camper combination. The method you select should have the capacity to handle the size and weight of your particular trailer and camper.

For Lance campers that come standard without a rear camper bumper, the trailer can attach to the truck using one of the following two methods:

1. Attach the trailer directly to a hitch ball mounted on the truck bumper. Bumpers rated for towing will have the maximum tongue and gross pulling weight stamped directly on the bumper where the hitch ball mounts. Always observe these ratings.
2. Attach the trailer to a frame-mounted receiver hitch on the truck. Receivers come in different classes or ratings. The highest-rated Class V receivers will allow tongue weights up to 1400 lbs and gross weights up to 14,000 lbs when weight distributed. One advantage to a receiver hitch is that ball mounts are available with different "drops" and lengths. You can pick just the right combination for the amount of drop you need so that your trailer tows level behind your truck.

Reese TITAN Class V Receiver
with 2-1/2" steel tube extension bar.

When towing behind a Lance camper that comes with a rear camper bumper, extending the hitch from the truck rearward to the camper bumper is necessary. The method Lance recommends involves a truck-mounted receiver hitch and extension tube. A ball mount is then inserted into the extension tube, the same way it would be inserted into the receiver itself. Reese manufactures a Titan Class V, 2-1/2" receiver and extension tube specifically for truck camper applications. It replaces factory receivers and substantially increases towing capacity. The other important benefit is that it does not require you to attach the hitch or extension to the camper, which eliminates line-up problems. The extension can be in place when loading or unloading the camper. For very heavy loads, the extension tube in combination with a weight-equalizing hitch can be used. This system has the highest certified tow ratings available (*see chart below*).

Always make sure to observe your truck's tow ratings and the advice of your Lance dealer or local hitch professional. A little care in matching a hitch system to your truck, camper, and trailer package will give you many happy, safe and trouble-free towing miles.

Hitch Applications & Capacities

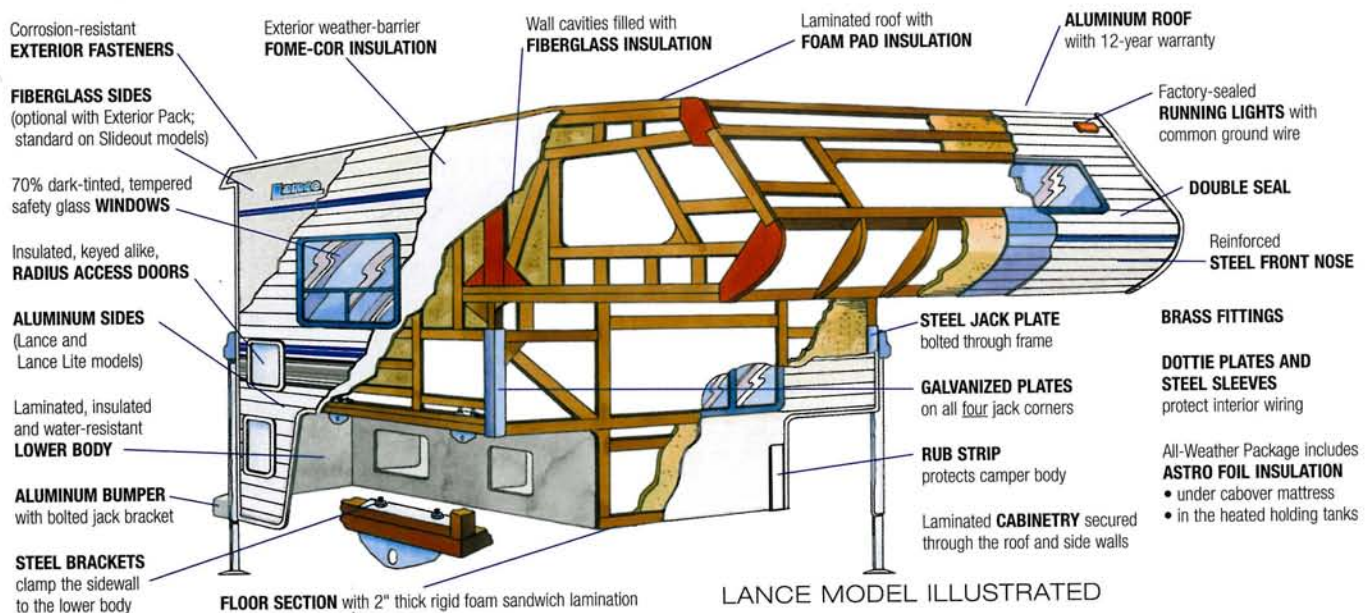

WEIGHT CARRYING/ TONGUE WEIGHT	WEIGHT DISTRIBUTING/ TONGUE WEIGHT	LANCE		LANCE
		SLIDEOUT	LANCE	LITE
10,000/1200	14,000/1400			815
				835
6000/600	8,000/800	821 (8') [†]	820 (8') [†]	845 (8') [†]
		921	920	915
			1010	1025
4500/450	6,000/600	1121	1030	
		1161*	1130	

[†]Indicates short-bed models with additional overhang

*Requires special extension bar

Note—All weights, dimensions and capacities are approximate values. Specifications are subject to change without notice.

BUILT TOUGH to STAY TOUGH

Truck campers are all we build, and with over 4 decades of experience, we know how to engineer and build them strong and long lasting, and we back it up with our two-year limited warranty on construction.

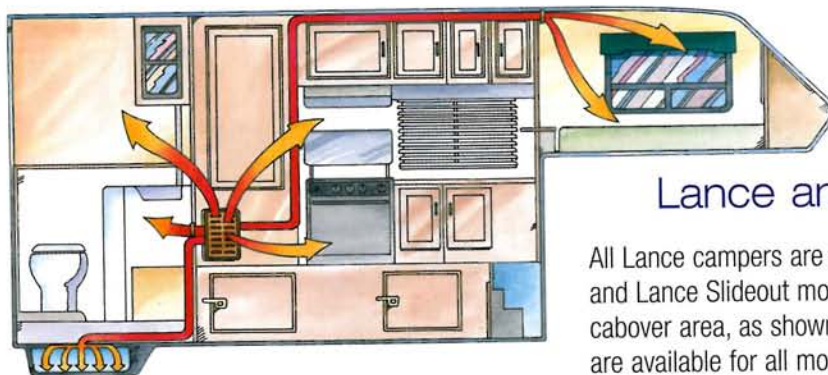

Using select kiln-dried premium-grade fir and pine, an intricate pattern of pieces is assembled and glued together to form the structure. Floors and ceiling panels are filled with rigid foam, glued and laminated to create the strongest possible structure.

Interior wall panels are glued to the frame structure for sheer strength. The camper is completely insulated: horizontal panels with rigid foam, and vertical walls with fiberglass. Even exterior compartments are insulated. Lance campers are wrapped with Fome-Cor Weather Barrier prior to the metal siding installation.

Optional Filon fiberglass sides have a luan backing that acts as an insulator in place of the Fome-Cor. The fiberglass sides are secured to the camper with special adhesive and bonded under pressure. Corners and tie-down brackets are reinforced with steel.

The laminated roofs are covered with our exclusive one-piece aluminum. It is the toughest, strongest, longest-lasting roof available. The Lance and Lance Slideout model roofs have special white paint that helps reduce heat, and makes cleaning easier. Also reduces streaks on camper sides.

When you step in a new Lance camper you will sense immediately that there is a difference. No other truck camper feels as secure and as strong. See for yourself.

Warm All Over!

Duct heat standard on Lance and Lance Slideout models

All Lance campers are equipped with large forced-air furnaces. Lance and Lance Slideout models also feature ducted heat to the bathroom and cabover area, as shown in the illustration. Optional All-Weather Packages are available for all models.

Camper power: how it works

The electrical system in your camper is attached to a power panel, which accepts both 12 and 110 volts. If the camper is plugged into household current (110V power) at a campground, the built-in converter changes it to 12 volts. Your furnace fan, range hood, water pump and lights are all 12-volt devices.

The power panel also distributes 110 volts to the refrigerator and to the 110V outlets so you can use virtually any household appliance. Additionally, the converter serves as a charger, keeping your camper battery fully-energized for the times you are not plugged into a 110-volt power supply.

When you're on the road, the alternator in the truck distributes power to both the truck battery and the camper battery. The camper battery operates all the 12-volt appliances when the camper is not plugged into a 110-volt source.

In many models, a propane-powered generator may be ordered. Just push the button and, in a few seconds, you'll have power to operate your microwave, air conditioner or almost any other 110-volt appliance, plus power for the camper's built-in converter system.

Propane is the fuel that powers the range-oven, the furnace, the water heater, the refrigerator and, if installed, the generator. When we say Lance campers are self-contained, that means you are equipped to go just about anywhere and take your "down-home comforts" with you.

A choice of siding:

aluminum or fiberglass

Truck campers have unique challenges, unlike other RVs. They take a lot of abuse, because they often are used off-road and in severe weather. Most campers spend their entire lives outdoors in all types of climates and conditions.

Aluminum has been popular for the exterior surface because of weight, cost, durability and ease of repair. The enamel paint on the aluminum surface will stay shiny for many years, like a car.

Fiberglass has become a popular replacement for aluminum for the siding of many recreational vehicles. It's ability to reject denting is the primary reason for its use. It's smooth surface more readily accepts creative graphics, and the sturdy flat surface makes it attractive. Although it is slightly heavier and more costly than aluminum, in areas of severe hail where the vehicle is subject to damage, fiberglass is preferred. Both aluminum siding and "glass" have their place and each has its own set of advantages.

Power from the sun: **Solar Panels**

Because the camper battery is wired to the truck alternator, you can recharge your camper battery while driving the truck. Unless you're on the move, that's not always practical ... but solar energy is. With the optional 50-watt output solar panel with built-in regulator, recharging your battery is silent, automatic and practical. Imagine the convenience of having a fully-charged battery whenever you are ready to go.

Solar panels are very useful in colder climates, where the furnace fan can draw down a battery in 24 to 48 hours. The solar panel generates energy, even on cloudy or rainy days, although not as much. Lance factory-installed panels have a red LED indicator light located beneath the sink, indicating when the solar panel is producing power.

Questions

we get asked most often about campers can be found on our extensive website:

Lance Earns DSI Award...Again!

Louisville, Kentucky — For the fifth year in a row, the National Recreational Vehicle Dealers Association presented their prestigious Quality Circle Awards for Dealer Satisfaction at their annual show in Kentucky. Lance Campers was one of only 6 RV manufacturers to receive the award from RVDA President, Michael Molino.

Jack Cole, President of Lance, said, "We take great pride in this recognition because it is a reflection of how our dealers feel about us, our product and the way we do business. All our employees will share in the great news."
