Independence Exclusive Features & Benefits

**SOLID
HARDWOOD
CABINETRY**

**PRE-DRILLED
HARDWOOD
CONSTRUCTION**

Our residential style cabinets are constructed of solid hardwood doors and fronts that are pre-drilled and screwed then they are stained and top coated with a furniture grade finish that provides long lasting beauty and durability as well as adding strength and quietness to your motorhome.

COMPETITOR'S CABINETRY

Other companies use wrapped cabinet fronts prone to peeling, fading and tearing. The softer composite wood used does not hold screws as well as hardwood resulting in loss of strength and squeaking. Discoloration will degrade the beauty and lower the value of the motorhome.

**GALVANIZED
STEEL
STORAGE
COMPARTMENTS**

Seamless, carpeted, galvanized steel storage compartments safely cradle your valuables. Rust protective paint and foam sealed for extended life and a quiet ride.

Dual metal H-Ducted air conditioning system with foil bubble wrapped insulation for superior climate control.

GULF STREAM VS. BRAND A Cool Down Comparison

- At 15 minutes, Gulf Stream cooled 7 degrees cooler.
- At 30 minutes, Gulf Stream cooled 9 degrees cooler.
- At 1 hour, Gulf Stream cooled 9 degrees cooler.

Finally, empirical data demonstrating the efficiency and performance of a roof air conditioning system versus a floor air conditioning system.

Winner: Roof air conditioning by Gulf Stream

Unlike traditional plywood and foam seating Comfort Plus dinette seating features the strength of steel and the comfort of a sprung cushion.

All Comfort Plus furniture by Gulf Stream Coach also features residential styling, solid construction, total comfort and a comprehensive warranty.

Cradle of Strength

The Cradle of Strength super strength truss system is unmatched in the RV industry. The structural subfloor foundation begins by welding a network of integrated steel trusses to the chassis rail. Specifically designed to distribute and transfer the tremendous forces from the coach to the chassis rail these trusses are individually tested to withstand 6,000 pounds each.

An all steel overhead structure installed above the cockpit brings strength and rigidity to the upper portion of the coach providing a safe strong platform to install a TV that will not break free in an impact and maximizing overhead storage.
