Jamboree Floor Plans, Standard Features and Options
Setting the Standard in Motor Home Quality.
Fleetwood® prototypes are exposed to thousands of miles of durability testing. Those components that don’t survive are redesigned until they do. This sets our standard in safety and durability.

1 Fleetwood’s Tuff-Ply roofing technology is one of the most durable roofing materials on the market and also resists radiation by reflecting sunlight (reduces chalking). White roof material minimizes heat build-up, keeping the temperature cool and comfortable.

2 Reliable TuffPEX® plumbing runs throughout each vehicle creating a durable seal on all internal tubing. TuffPEX® assures water flow and functions in the coldest of temperatures. The TuffPEX® system is an industry leader in quality plumbing.

3 For each outer wall, Fleetwood uses one seamless, solid piece of its exclusive Tuff-Coat® fiberglass composite. It resists UV rays, cracks and impacts. Our products look newer longer and that’s a big plus at resale time.

4 To assure a strong, weather-resistant structure, Fleetwood Vacu-bonds® all sidewalls, floors and ceilings to a durable aluminum or steel frame. The Vacu-bond® process is unmatched by many competitors.

5 High Density block foam insulation is precisely cut to fit between framing members. This insures maximum insulation throughout the vehicle.

Seatbelt configuration may vary depending on options chosen. Sleeping capacity based on standard layout. Optional furniture may increase or decrease sleeping capacity.

1. **GVWR (Gross Vehicle Weight Rating):** Means the maximum permissible loaded weight of the motor home. The GVWR is equal to or greater than the sum of the unloaded vehicle weight plus the net carrying capacity.
2. **GAWR (Gross Axle Weight Rating):** Means the maximum permissible loaded weight a specific axle is designed to carry.
3. **Base Weight:** Means the estimated weight of the motor home without fuel, options, water, cargo or passengers.
4. **GCWR (Gross Combined Weight Rating):** Means the value specified by the motor home manufacturer as the maximum allowable loaded weight of this motor home with its towed vehicle. Towing and braking capacities may differ. Refer to Fleetwood and chassis manufacturer manuals for complete information.
5. **Length taken from front bumper to rear bumper (excludes accessories).**
6. **Excludes safety equipment and awnings.**
7. **Tank Manufacturer’s listed water capacity (WC). Actual LPG capacity is 80% of water listing as required by the safety code.**

† Only if standard.

* The chassis manufacturer recommends the installation of a supplemental brake control system to activate the brakes on the vehicle or trailer you are towing.
