**WHAT HAPPENS WHEN YOU SET THE STANDARDS  
OF RV QUALITY FOR OVER 50 YEARS?****YOU SET THEM EVEN HIGHER...**

Our customers expect us to. As a matter of fact, first-time RV buyers, who bought other manufacturers' RVs, tell us they wish they'd spent a little bit more for better quality. That's why experienced buyers are more likely to buy a Fleetwood RV.\* That's also why Fleetwood RV invests in people, systems, and manufacturing quality that are second to none. This *may* make us a bit more expensive than some brands, but satisfied Fleetwood RV owners know we're worth it.

**PEOPLE...**

We hire engineers, designers and drafters from leading automotive design schools. Our front-line associates are well-trained, quality-minded men and women who take pride in their work. No other manufacturer has a larger, more professional team behind their products.

**SYSTEMS...**

Our product development team uses state-of-the-art, computer-assisted-design (CAD) technology to build in fit and finish right from the drawing board. Each product is meticulously documented with over 3,500 pages of engineering drawings. A computerized bill of materials details over 20,000 pieces that go into

And, a vehicle specific *Electronic Parts Catalog* shows 600 – 800 common parts... so, if you need a new part, your authorized Fleetwood RV service dealership knows exactly what you need. Some manufacturers may not invest the extra time and money to accurately document their products, which could cost you plenty in headaches and hassles down the road.

We only do what we know we're best at—building a quality-finished motor home. When it comes to the appliances, doors, windows and furniture, we partner with other recognized leaders to do what they know best... top names like Sharp®, Panasonic®, Dometic®, Restonic® and Flexsteel®. Some manufacturers will tell you partnering like this makes us final assemblers. We call it working smarter to bring you more value.

**QUALITY...**

The quality outside reflects the quality inside—places where you can't see it, but where it really counts. For example, we use vacubonded sidewall construction that's required for the special needs of a motor home. Our new TuffPEX™ plumbing system is able to withstand temperatures

as low as -40° F. Before any unit rolls off the line at each of our plants, it goes through a documented checklist containing hundreds of items specific to that product. It won't leave the plant until it has met our high standards. And, the list goes on.

From the drawing board to the assembly line, we will continue to develop and manufacture quality products for our customers.

Fleetwood RV... setting standards beyond your expectations.
