Excursion

Holding tanks are positioned in the bottom center of the platform to enhance vehicle stability.

Holding tanks are enclosed between the upper and lower basement floors. This allows them to be heated to prevent freezing in cold weather.

Platform design creates lots of storage area and supports the sturdy Vacu-Bonded® walls.

POWER PLATFORM CONSTRUCTION

Fleetwood's patented Power Platform begins with two 10-in. steel I-beams welded lengthwise to the chassis. From the beams, steel outriggers extend outward. Together, they create a basement for fluid tanks and storage while supporting the floor, walls and roof with a rigid metal frame. This complements the chassis to make it even stronger.

** Drawings are for illustrative purpose only to highlight aspects of motor home construction. Actual motor home design depends on model and is subject to change.*

A 2 STAGE DUPONT® PAINT PROCESS (full-body paint standard) is carefully applied for maximum durability and a sleek exterior look. This process ensures only the best in quality and appearance.

4 POINT AUTOMATIC LEVELING SYSTEM levels your Excursion while parked with a one-button push, or a do-it-yourself manual override.

DUAL AIR CONDITIONING UNITS
Excursion has maximum cooling capacity and plenty of storage because its A/C units are mounted on the roof and not in the basement.

THE EXTERIOR SPOTLIGHT (optional) is a great feature to provide additional light at night when exploring your surroundings.

REDESIGNED FRONT CAP includes stylish revamped headlights that is sure to turn heads.

STORAGE COMPARTMENTS are lighted and include single paddle metal latches, gas-lift strut supports, stainless-steel hinges and insulated aluminum doors.

**Vehicle shown with White Diamond full-body paint.*
