This is Living
You’re ready. Ready for adventure. Ready to get moving. And, ready to discover what’s out there. All of this means you’re ready for the 2007 Endeavor from Holiday Rambler. There’s a reason — actually many reasons — why the Endeavor is one of the most popular coaches on the road. And when you take a closer look you’ll discover them one by one — starting with an exterior that really stands out thanks to deluxe full-body paint with new graphics. We also added a new rear cap that distinguishes this as a Holiday Rambler. A name that not only gets you noticed, but comes with built-in fun and adventure with some of the largest and most active owners’ clubs on the road. You’ll soon discover that with an Endeavor, fun, friends and adventure are always around the next corner.

NOW THIS IS BIG. New for 2007 is a really big idea from Holiday Rambler, the PanaSuite™ full-wall slide. It makes a world of difference, creating a roomy, uninterrupted space. And, it’s available now on select Endeavor floorplans.

FUEL FOR YOUR ADVENTUROUS SPIRIT.
Step inside the 2007 Endeavor and you’ll discover what life on the road should be like. Plush furnishings, designer carpeting and ceramic tile — it’s all here. New for 2007 is an optional tile runner that runs from the cockpit to the newly redesigned kitchen — where you’ll find sleek black or stainless steel appliances, including a handy microwave/convection oven and a sealed burner cooktop. Choose the standard four-door refrigerator or opt for a two-way model with an ice dispenser. We also added cathedral cabinet doors on all upper cabinets and a stylish polished radius countertop with a pullout extension complete with drawers on most models. But those aren’t all the changes — we moved the entire kitchen to the front of the RV on the 40SKQ floorplan and put the refrigerator in the slide-out when possible for a more open feel.

After cooking in the new kitchen, enjoy your culinary creations at Endeavor’s legless dinette table with two dinette chairs and two coordinating folding chairs for extra guests.
Any adventure requires time out for rest and relaxation. For afternoon cat naps, close the blackout day/night pleated shades and stretch out on the optional leather magic bed sofa or hide-a-bed with air mattress. When it’s time to catch some serious Zs, climb in the comfy queen bed, or if you prefer, the optional king. Both sizes are available with a Select Comfort air mattress for a truly restful night’s sleep.

There’s plenty of storage throughout the Endeavor, including several overhead storage compartments with self-supporting top-hinged doors. You’ll find even more storage in the bedroom with one or two nightstands, a dresser and an oversized rear closet wardrobe on most floorplans. The bathroom offers a vanity with under-sink storage and drawers. So when it comes time to pack, just go ahead and bring it all — except for the vacuum. Just add the optional central vacuum system that stores in its own compartment for easy accessibility.
As you climb into the cockpit, take a look around. The dash now has a dazzling Oxford burl wood instrumentation panel. You’ll find everything right where you need it, including a new co-pilot side console. And while Endeavor is equipped with a powerful Cummins® 400 HP engine, its cushion air glide suspension makes you feel like you’re riding on air. It’s also easy to drive with plenty of safety features, including the six-way power seats and adjustable brake and accelerator pedals for ideal positioning. Controls are integrated into the lighted VIP Smartwheel®. And, the Panaview™ 1-piece windshield provides an unobstructed view of what’s ahead, while the color rear vision system with audio and adjustable camera lets you see what’s behind.

The CD player/radio now includes a DVD player hooked up to the stunning new 24” or optional 32” flatscreen LCD TV.

Endeavor’s large pass-through storage area not only makes packing easier but also makes it a snap to find and retrieve those things you packed.
Holiday Rambler makes it easy to take your style on the road. We offer a variety of decors — each as lovely as the next with rich fabrics, lustrous woods, eye-catching accents and stunning exterior graphics. So the problem isn’t finding a look you like, it’s narrowing it down to just one.
**ENDEAVOR HARDWARE**

Our elegant cabinet hardware design features a satin nickel finish.

Manufactured in, not added on. For added protection against stains, soil repellant is applied to virtually all upholstery fabric during the finishing process for superior coverage.*

*Brand and application of upholstery fabric protection may vary depending on date recreational vehicle was manufactured.
ROADMASTER R-SERIES CHASSIS

At the heart of the 2007 Endeavor is the Roadmaster Raised Rail RR8R-Series chassis. Designed for the high performance standards of a luxury motorcoach, the chassis is custom-built to the exact specifications of each floorplan — giving you an unbeatable ride and superior handling along with many innovative features. We invite you to take a few minutes and discover all the ways Roadmaster offers you the very best in safety, reliability, comfort and convenience.

ALUMAFRAME® CONSTRUCTION SINCE 1966:

The Endeavor features Holiday Rambler’s exclusive Alumaframe® Superstructure. Our revolutionary system of aluminum C-Channel crossmembers runs the entire length of the unit, with double-welded intersections for added strength. This rigid design is both lighter and sturdier than tubular aluminum frames — and much more reliable than butt-welded or screwed joint designs. From dirt roads to potholes, you can count on Alumaframe® to handle the relentless stresses of the road and provide superior structural integrity for many years to come.

1 A steel cage cockpit gives the Roadmaster chassis incomparable strength and safety in the front of the coach.
2 Every Roadmaster chassis features a steel firewall for added protection in the cockpit.
3 The main rails feature an exclusive raised rail design which provides for larger full pass-through storage bays with flush floors. Other highlights include a 3/8” thick frame rail — compared to the 1/4” of other manufacturers — and a stacked aluminum intercooler and radiator for optimum heat transfer and cooling.

9-LAYER ROOF CONSTRUCTION (top to bottom)

- One-piece peaked fiberglass roof
- Luaun backing
- Thick, tapered bead foam insulation
- Aluminum double I-beam superstructure filled with fiberglass insulation
- Vapor barrier
- Structure foam: thermal insulative barrier
- 1/2” bead foam insulation
- Foam padding for extra insulation
- Padded vinyl ceiling
4. Dual fuel fill allows you to fill the tank from either side of the coach, for greater convenience and flexibility at the pump.

5. Truss System with Rust Inhibitor: This steel truss system is engineered as part of the chassis and provides outstanding strength and rigidity plus pass-through storage. In addition, the structure is pre-primed and coated with a rust-inhibiting paint.

6. Eight outboard-mounted air bags work in conjunction with eight gas-powered shock absorbers to prevent road trauma from ever reaching the coach.

7. Monitored leveling sensors continually adjust the air pressure at each axle to maintain a level ride and eliminate nosediving, weight transfer, and floating on curved roads. This system also stabilizes the coach on uneven surfaces.

9. Engine Mounting: The three-point engine mounting system lowers the coach’s center of gravity and reduces the amount of vibration that reaches the coach. The mounting also makes the engine easier to service.

10. A 10,000 lb. tow hitch rating is the highest in its class.

11. Automatic Traction Control (ATC) eliminates wheel slippage in slick conditions and heightens control. The Anti-Lock Braking system (ABS) gives you superior stopping power, especially on steep grades. Together, these sophisticated systems offer the very best safety on the road.

* Towing capacity is limited by GCWR; your vehicle’s towing capacity is the difference between the GCWR and the actual vehicle weight, including all water, fuel, passengers and cargo. Your towed vehicle should be equipped with auxiliary brakes if the weight of the towed vehicle exceeds 1,000 lbs. Consult your owner’s manual for further towing information.

** All tank capacities are estimated based upon calculations provided by the tank manufacturers and represent approximate capacities. The actual “usable capacity” may be greater or less than the estimated capacities based upon fabrication and installation of the tanks.

*** Actual filled LP capacity is 80% of listing due to safety shut-off required on tank.
