HAULMARK MOTORCOACH DURABILITY & DISTINCTIVE RESIDENTIAL FLOORPLANS

DURABLE, GREAT LOOKING WALLS AND ROOF

(1) Aluminum tube uprights and crossmembers provide a sturdy frame structure. **1**

(2) The smooth, high-luster Gel Coat finish is great for graphics. A vacu-bond process joins framing, insulation, and exterior and interior walls into a single component.

(3) The crowned aluminum roof, a Haulmark exclusive, is three inches higher in the center enabling rapid water runoff.

(4) Pre-formed roof foam insulation and custom fit sidewall insulation helps keep the coach temperate inside.

(5) One-eighth inch lauan is sandwiched between the foam insulation and exterior skin for an extra layer of thermal protection.

(6) One-piece aluminum sheeting over the crowned roof trusses sheds water easily, yet is strong enough to support your weight.

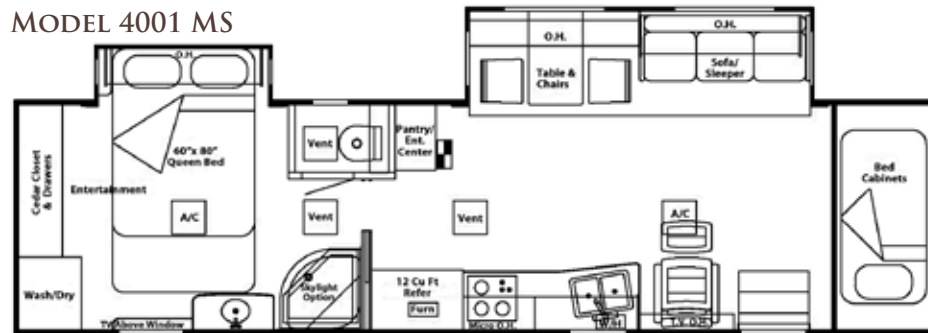

(7) Insulated A/C roof duct standard on all Motorcoaches.

(8) Interior decor panel vacuum bonded to aluminum structure and foam insulation.

Haulmark earns certification by the **Recreational Vehicle Industry Association**. All Haulmark coaches carry the RVIA (Recreational Vehicle Industry Association) certification label. This insures the living quarters meet the exact specifications mandated by RVIA for important construction, electrical and plumbing installations. A coach without the label offers no guarantee its workmanship is up to code.
