

# the 1976 Brave.

Brave takes you to the four corners of fun: the oceans, the rivers, the lakes and the streams. To surf and sand and suntans . . . to seashells, seafood and souvenir shops. It's the full-size motor home that almost anybody can afford. Anybody with dreams and the will to give them wings.

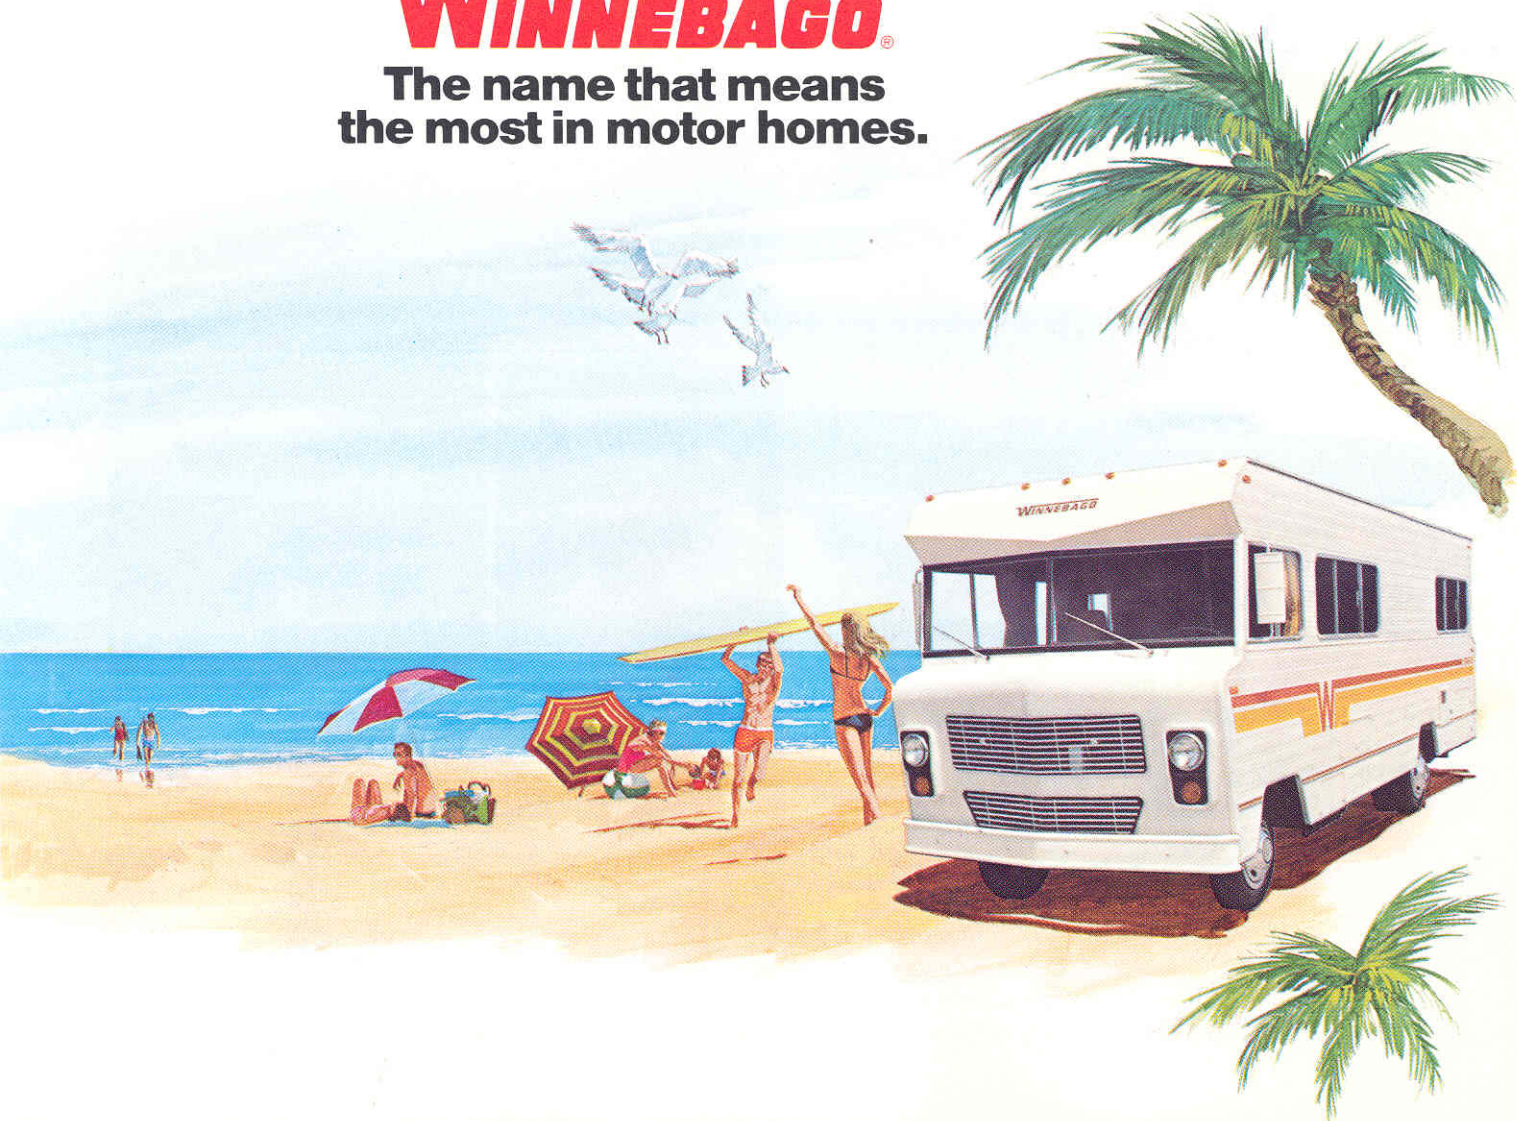

This year Brave is even roomier and more full of fun. With exciting new features indoors and out.

Outside, more storage; it's weatherproof too. Inside, more space— from bedrooms and bathrooms to cabinets and dinettes.

And, throughout, Winnebago's special touch of craftsmanship and planning that makes even our lowest priced Brave a great indoors too.

- 25 gallon auxiliary water tank (D-21)

# RV living is at its best when value goes along for the ride.

Brave value for 1976 doesn't begin with the purchase price and end with operating costs. It's measured by the value delivered for the dollars you spend. It's indicated by how long your Brave lasts and by resale value.

And it's reflected by Winnebago's experience and ability in delivering the kind of motor home that's right for your family, and in delivering a motor home with a reputation for strength and durability that lasts.

Winnebago has made more motor homes than any other manufacturer. And we have made more motor homes better.

And, if there is anything more important to the RV owner than the integrity of the manufacturer, it is the after-purchase service of the dealer. Winnebago offers over 300 authorized dealers to help you across the country with service, parts and friendly advice.

Motor homing is a way of life with our sales and service dealers and you can count on trained experts looking after your Brave.

Also when you buy a Winnebago, you're automatically a member in Winnebago International Travelers Club, offering rallies, tours, caravans, a monthly newspaper, plus a host of services and a big savings on RV insurance.
